# WELCOME TO DIVERSIFI

## AN INTRODUCTION

**Diversifi aims to be your ultimate portfolio builder on the Binance Chain by offering passive income & portfolio diversification with an automated rotating rewards system.**

**Diversifi** hopes to help alleviate the stress involved within the crypto space by reducing the need to find, research, and develop a diversified buy and hold strategy. Savvy investors know that buying tokens periodically, without regard to price and attempts to time the market, may lead to greater gains than large single purchases.

**Diversifi's** unique portfolio building system embraces these strategies. Diversifi's smart contract will rotate through five reward tokens using a randomized round robin system that will change the distributed reward token every six hours. These tokens are purchased automatically, without regard to price and time.

**By holding a Diversifi token, the holder passively accumulates and diversifies their holdings with five tokens every 30 hours.**

### DISCLAIMER

We believe it is important that you understand the nature of crypto holdings - the market can be very volatile and losses are common. We do not recommend that you buy, sell, hold, trade any crypto asset and it is important to remember that you do not invest anything that you are not willing to lose. We do not provide financial advice, please do your own research and practice safety.
